

Tertiary Roads

Synopsis:

For a smart city traffic & road system is a major concern for development. Our team has come up with integrated system as a solution for the same.

→ Our system manages:

- 1) Remote traffic control
- 2) traffic violation handling
- 3) vehicle population and data
- 4) live and interactive portal with all driver
- 5) It is self monetizing & also an Artificial Intelligence to manage the processes prior mentioned

→ It has a dedicated hardware and software sector is a major role

→ Deals with telecom, solar and embedded systems

→ Pros:

- 1) Employment
- 2) Safer and sound road environment
- 3) Reduced Road related Crimes
- 4) Substitutes police manpower on roads
- 5) more durable roads
